CSM_G7TC_DS_E_2_2

Single Cable Connection to PLC Means Space is Saved and Less Control Panel Wiring is Required.

- Compact size: 182 (W) × 85 (D) × 68 (H) mm (8-point Output Block width is 102 mm).
- Connects to the PLC through the connecting cable (G79
 Series) and connector, and requires only a snap-in operation.
- Surge suppressor circuit built-in.
- Immediate recognition of I/O signal status using LED operation indicators.
- G3TA I/O Solid-state relay can be mounted instead of G7T.
- Mounts easily on a DIN track.
- Approved by UL, CSA (except for G7TC-OC16-1).

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

Ordering Information

I/O Relay Terminal When your order, specify the rated voltage.

I/O classification	I/O points	Internal I/O common	Rated voltage	Model
			12 VDC	
			24 VDC	G7TC-ID16
Input	16	NPN (- common)	100 (110) VDC	
			100 (110) VAC	G7TC-IA16
			200 (220) VAC	G/IC-IAI0
Output	16	NPN (+ common)	12 VDC	G7TC-OC16
			24 VDC	G/10-0016
		PNP (– common)	12 VDC	G7TC-OC16-1 *
			24 VDC	G/10-0010-1 #
	o	NPN (+ common)	12 VDC	G7TC-OC08
	8	NPN (+ common)	24 VDC	G/10-0000

Note: When ordering, add the rated coil voltage to the model number.

Example: G7TC-ID16 24 VDC

- Rated coil voltage

* Not approved by UL, CSA.

Indicator Module (With Surge Suppressing Function)

	Model	Applicable relay coil voltage	Remarks	
For AC relay	P70A	100 (110) V AC	Varistor surge suppression	
		200 (220) V AC	varistor surge suppression	
For DC relay	P70D	12/24 V DC	Diode surge suppression	

Note: 1. Order the indicator module suitable for the relay coil voltage.
2. The indicator module for DC relays can be used with a 12-V or 24 V DC power supply.

Accessories for DIN Track Mounting

Refer to your OMRON website for details on the PFP-.

Model Number Legend

A G7TC I/O Relay Terminal is a combination of (8 or 16) G7T I/O Relays with SPST-NO specifications and a P7TF I/O Terminal Socket.

1. Input/Output Classification

I: For input

O: For output

2. Type of I/O Signal

A: AC coil type for input relays mounted (Input/Output Classification: I)

D: DC coil type for input relays mounted (Input/Output Classification: I)

C: Contact output for output relays mounted (Input/Output Classification: O)

3. Number of I/O Points

16: 16 points

08: 8 points (for output only)

4. Internal I/O Common

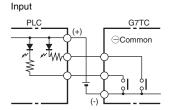

Blank: NPN

Specifications

Coil Ratings (Common to Input/Output per Relay)

Rated voltage (V) Rated voltage (V) Rated voltage (V)		Coil resistance	Must operate	Must release	Maximum voltage	Power co	nsumption		
		50 Hz	60 Hz	(Ω)	of rated voltage			per Relay	per 16 Relays
AC	100/(110)	8.2/-	7/7.7	8,700	80% max.	30% min.	105%	0.7 VA	11 VA
	200/(220)	4.1/-	3.5/3.85	33,300					
	12	4	2	290					
DC	24	2	1	1,150	80% max.	10% min.	105%	0.5 W	8 W
	100/110		5	20,000					

Note: 1. The rated current and coil resistance are measured at a coil temperature of 23°C with a tolerance of 15%/-20% for AC rated current and ±15% for coil resistance.

- 2. The operating characteristics are measured at a coil temperature of 23°C.
- 3. The value for maximum voltage is the maximum value within the allowable voltage fluctuation range for the relay coil's operating power supply. Continuous operation at this voltage is not within product specifications.
- 4. Approx. 4 mA flows into each LED indicator. To calculate the power supply capacity, add the current value of each LED indicator.
- 5. When the G7TC is used with an AC rated voltage, three rated currents can be used. If a coil voltage of 110 or 220 VAC is used, 50 Hz cannot be used.

Contact Ratings (G7T I/O Relay)

Classification	For	input	For output			
Item	Resistive load (cos¢=1) Inductive load (cos¢=0.4 L/R=7 ms)		Resistive load (cosh-1)		Resistive load (cosφ=1)	Inductive load (cosφ=0.4 L/R=7 ms)
Rated load	1 A at 24 VDC	0.5 A at 24 VDC	2 A at 220 VAC 5 A at 24 VDC	1 A at 220 VAC 2 A at 24 VDC

Note: The above values are initial values.

- *1. Measurement: 1 A at 5 VDC.
- *2. Ambient temperature: 23°C.
- *3. This is between connector pin No. 10 and 20, and between connector pin No. 9 and 19.
- $\pmb{*4.} \ \text{Connecting cables up to 5 m are available as standard products. For longer cables, enquire separately.}$

UL and CSA Standards

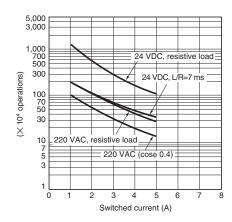

Standard G7TC I/O Relay Terminal, except for the G7TC-OC16-1 and the G7TC-OC08, have met UL and CSA standards (UL file no. E95399; CSA file no. LR35535).

Note that the following UL- and CSA-qualifying ratings differ from the performance characteristics of the individual models:

Model	Coil ratings	Contact ratings
G7TC-ID16, G7TC-IA16	10 mA/point, 24 VDC	250 VAC max.
G7TC-OC16	Coil drive current, 24 VDC	Inductive load: 10 A, 250 VAC Resistive load: 10 A, 30 VDC Rated horsepower: 1/2 HP, 240 VAC

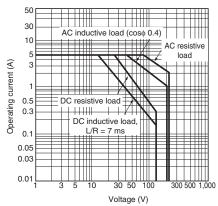

Engineering Data (Reference Value)

Life Expectancy of Output

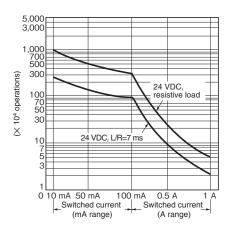

Max. Switching capacity of Output

(Life expectancy: 1,000,000 operations)

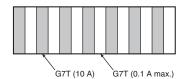

Life Expectancy of Input

Note: These data are actual measured values that were sampled from the production line and prepared in graph format, and are for reference purposes only. A relay is manufactured by mass production, and as a basic rule must be used with allowance made for a certain amount of deviation.

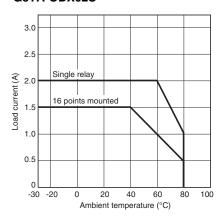

Example for Output Block (for Reference)

If a G7T I/O Relay is mounted in every other position on an Output Block (see drawing), a resistive load of 10 A (24 VDC) can be switched. Note that the service life is reduced to 150,000 operations in this case.

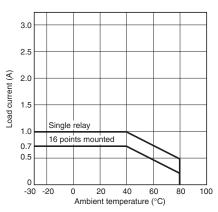

Load Current vs. Ambient Temperature G3TA-OA202SZ

G3TA-OA202SL G3TA-ODX02S

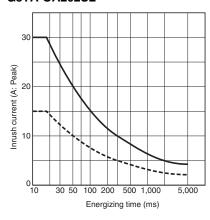

G3TA-OA201S

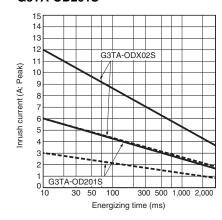

Inrush Current

The following graphs show the maximum inrush currents that can be withstood for non-repetitive operation. For repetitive operation, the figures should be reduced by half.

G3TA-OA202SZ G3TA-OA202SL

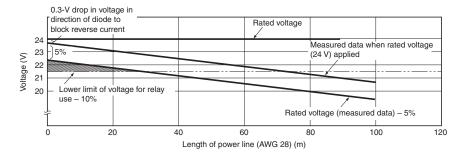

G3TA-ODX02S G3TA-OD201S

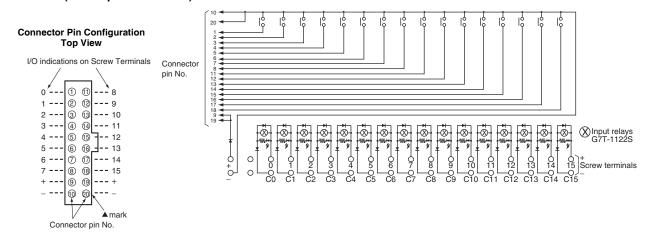

Cable Length

The following graph gives reference values for the relationship between cable length and voltage in the case where the voltage fluctuation of the power supply is 5%.

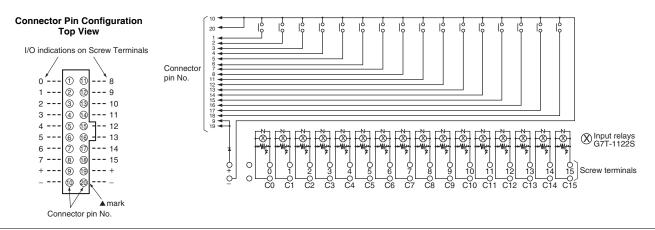

Internal Circuits

G7TC-ID16 (NPN input/- common)

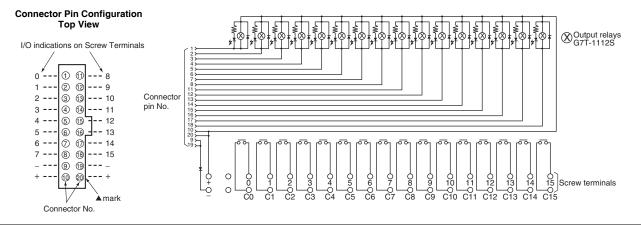

G7TC-IA16 (NPN input/- common)

Note: Pin numbers are indicated for convenience. The ▲ mark can be used to determine orientation.

G7TC-OC16 (NPN output/+ common)

Note: A controller with an NPN transistor, common output can be connected to the G7TC-OC16.

G7TC-OC16-1 (PNP output/- common)

Note: A controller with a PNP transistor, + common output can be connected to the G7TC-OC16-1.

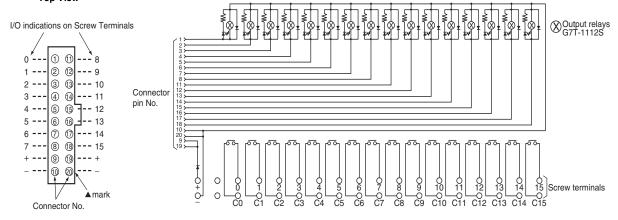

Do not connect the G71 Remote Interface to the G7TC-OC16-1.

Due to the difference in polarity, the G71 will be damaged if the G7TC-OC16-1 and the G71 are connected to each other.

Use the G7TC-OC16 (NPN output/+ common) instead, to connect to the G71.

The reception of orders for G71 Remote Interface was discontinued at the end of March 2012.

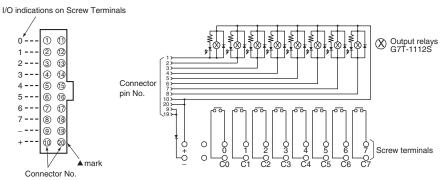

Connector Pin Configuration Top View

G7TC-OC08 (NPN output/+ common)

Note: A controller with an NPN transistor, -common output can be connected to the G7TC-OC08.

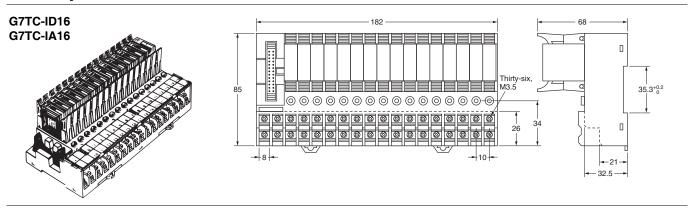

Connector Pin Configuration Top View

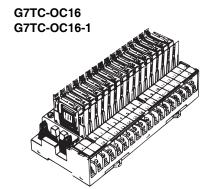

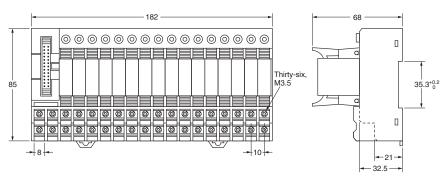

Note: Pin numbers are indicated for convenience. The ▲ mark can be used to determine orientation.

Accessories (Order Separately)

Short Bar G78-04

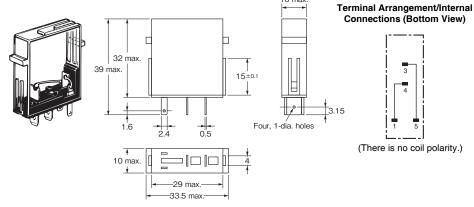

Use this piece for short-circuiting across terminals. Max. current flow: 20 A

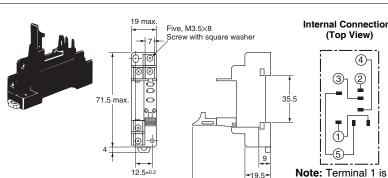

Output Short-Circuit Module

The output of the I/O Relay Terminal can be obtained without relays through the G77-S Output Short-Circuit Module. Note that the G77-S Output Short-Circuit Module is not available for inputs.

Socket P7TF-05

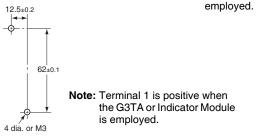

The G7T (SPST-NO, SPST-NC, and SPDT types) and the G3TA I/O Relays can be mounted on the P7TF-05 Socket. The P7TF-05 can be used for applications involving sequences that require slim relays, or to enable use of SPDT relays with the I/O Relay Terminal. To use part of the I/O Relay Terminal with SPDT specifications, insert an Output Short-Circuit Module into the I/O Relay Terminal, and use the P7TF-05 Socket in combination with an SPDT Relay for the Module's output.

Specifications

Contact resistance	10 m Ω max. (measured at 5 V DC, 1 A)			
Dielectric strength	2,000 VAC for 1 minute			
Insulation resistance	1,000 MΩ min. (at 500 V)			
Vibration resistance	10 to 55 to 10 Hz, 0.5 mm single amplitude (1.0 mm double amplitude)			
Shock resistance	1,000 m/s ²			
Ambient temperature	Operating: -40 to 70°C (with no icing or condensation)			
Ambient humidity	5% to 85%			
Weight	Approx. 28 g			

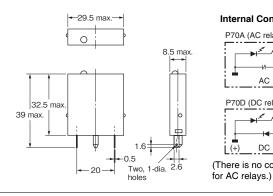

59 max

Indicator Module (With Surge Suppressing Function)

Remove the transparent style strip of the P7TF-05 socket and mount this module and it will function as an operation indicator with the surge suppression.

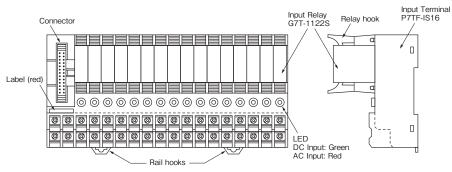

Internal Connection P70A (AC relays) P70D (DC relays) -w DC (There is no coil polarity

Terminal Arrangement / Terminal Connection Example

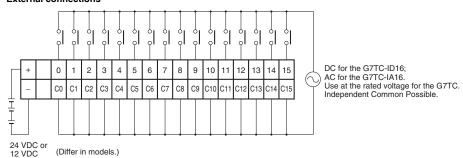

Input G7TC-ID16 G7TC-IA16

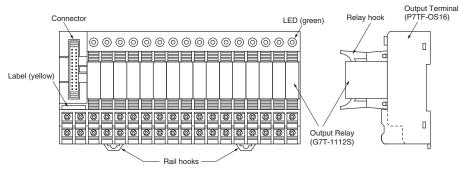

- Supply power to terminals 0 through 15 and C0 through C15 according to the voltage specifications of the I/O Relays and I/O Relay Terminal. Do not reverse positive and negative terminals on the DC Input Block (0 through 15 are positive; C0 through C15, negative). Short Bar is available.
- Supply to the power terminal (positive and negative) the rated voltage of the controller's input circuits (24 VDC or 12 VDC). Use a low-noise power source
- power source.

 When using a Connecting Cable with two connectors, be sure to use the Cable for Input Blocks. Using the Cable for Output Blocks may result in malfunction or damage to the product. Connecting Cable: XW2Z-R
 Tape Color: Red

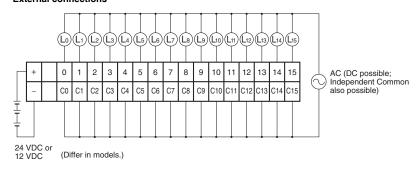

External connections

Output G7TC-OC16(-1) G7TC-OC08

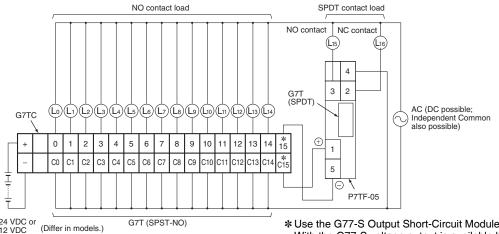

External connections

- There are voltage specifications for the Relays and Terminals. Depending on the controller connected, select either 12 or 24 VDC.
- Supply power to contact output terminals 0 through 15 and C0 through C15 according to the requirements of the loads. A 4 terminal Short Bar is available.
- Supply to the power terminals (positive and negative) power both for driving the relays and for controller output transistors. Match the controller and I/O Relay Terminal voltage specifications. Use a low- noise power source.
 When using a Connecting Cable with two
- When using a Connecting Cable with two connectors, be sure to use the Cable for Output Blocks. Using the Cable for Input Blocks may result in malfunction or damage to the product. Connecting Cable: XW2Z-R Tape Color: Yellow
 Output Block Unit G7TC-OC08 does not have
- Output Block Unit G7TC-OC08 does not have terminals 8 through 15 and C8 through C15.
 Although a 20-pin connector is used, pins 11 through 18 are not connected.
- When an I/O SSR (G3TA-OD
 is mounted, terminals 0 to 15 will be positive.

Connection Example for SPDT Relays

The following is an application example for the P7TF-05 using an SPDT Relay on a terminal of the G7TC-□□16(-1).

* Use the G77-S Output Short-Circuit Module in place of the G7T I/O Relay. With the G77-S voltage output is available between terminals 15 and C15. The maximum current is determined according to the controller.

Note: If more than one G77-S Output Short-Circuit Module is employed, the voltage output of the terminals on the G7TC is as follows: G7TC-OC16: The positive side (the lower row) connects to the common line internally.

G7TC-OC16-1: The negative side (the upper row) connects to the common line internally.

Safety Precautions

Be sure to read the *Safety Precautions for All I/O Relay Terminals* in the website at: http://www.ia.omron.com/.

General

I/O Relays and I/O Relay Terminal can be combined as follows to form I/O Relay Terminal:

	I/O Relay Terminal	I/O Relay	I/O SSR *2		I/O Terminal (Socket) *3
DC input	G7TC-ID16	G7T-1122S * 1	DC	G3TA-IDZ002 (M)	P7TF-IS16 (DC type)
AC input	G7TC-IA16	G/1-11225 #1	AC	G3TA-IAZR02S	P7TF-IS16 (AC type)
DC output G7T	G7TC-OC16 G7TC-OC16-1 G7TC-OC08	G7T-1112S (SPST-NO type) *1 G7T-1012S (SPST-NC type)	AC	G3TA-OA202SZ G3TA-OA202SL	P7TF-OS16
			DC	G3TA-ODX02S G3TA-OD201S	P7TF-OS16-1 P7TF-OS08

- *1. These are the I/O Relays mounted on the G7TC I/O Relay Terminal.
- *2. To use I/O SSRs, remove the I/O Relays and mount the I/O SSRs to the slots where the I/O Relays were mounted. Or, order and combine a P7FT I/O Terminal and I/O SSRs.
- *3. The P7TF I/O Terminal provides only sockets. It does not have Relays mounter to it. Mount I/O Relays or I/O SSRs to the sockets. Specify the rated voltage in the same way as when ordering the G7TC I/O Relay Terminal.
- Combinations of AC Input Relays/SSRs and DC Input Relays/ SSRs cannot be used with the same Terminal. This is because specifications for coil surge suppression elements are different. Relays/SSRs with different voltage specifications cannot be used with the same Terminal. (For example, a 100-VAC Input Relay and a 200-VAC Input Relay, or a 12-VDC Output Relay and a 24-VDC Output Relay cannot be used with the same Terminal.) This is because specifications of operation indicator circuits are different.
- Only use I/O Terminals, I/O Relays, and I/O SSRs with the same specifications for rated voltage.
- I/O Relay Terminal are color coded, as shown below, according to input/output and AC/DC specifications.

		I/O Terminal label	I/O Terminal indicators	I/O Relay case
for Input	DC	Red	Green	Green
	AC	Red	Red	Red
for Output	DC	Yellow	Green	Transparent

- Both Input and Output Blocks do not have internal power supplies.
 For an Output Block, supply the relay drive power to the positive and negative terminals (either 12 or 24 VDC). Loads (terminal contacts 0 through 15) must also be supplied with appropriate power. For an Input Block, supply, to the positive and negative terminals, power for input signals to the controller.
- The same Connecting Cable, XW2Z-RY, is used for the G7TC-OC08 eight-point Output Block as for other I/O Relay Terminal; leave 8 points unconnected.
- Indicators indicate the presence or absence of signals.
 Use the display lever inside each relay for fault diagnosis. (Some relays do not have this lever depending on the specifications.)
- Each relay must be pressed down until its hold-down hooks engage completely. Heating or malfunction can result if relays are not mounted properly.
- Unlabeled terminals are not electrically connected. Use these for repeater terminals.
- Indicator positions and relay orientation differ between Input and Output Blocks. This is to aid in differentiating Input Blocks from Output Blocks and in following signal flow.

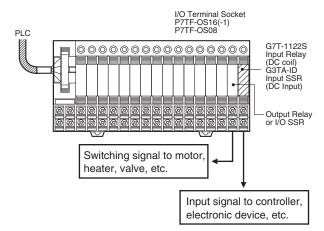

- DIN tracks are generally used to mount I/O Relay Terminal. For screw mounting, a 210-mm DIN track is available that can be used as an adapter in combination with End Plates (PFP-M, two required).
- A Short Bar is provided to connect four terminals. The current capacity of the Short Bar is 20 A. As long as this current capacity is not exceeded, the Short Bar can be used in combination as shown at the right to connect more than four terminals.

 Special Connecting Cables are provided for connections to OMRON PLC I/O Units with Connectors. Connecting Cables with two connectors, however, come in two types: Cables for Input Blocks (XW2Z-R) and Cables for Output Blocks (XW2Z-R).
 Be sure to purchase the correct Cable for the application.

Microload Switching

Input Relays (DC coil type) and I/O SSRs (DC input type) can be mounted onto an Output Block. Doing so enables using controller programming to simultaneously switch on or off two outputs (DPST-NO operation) to switch a SPST-NO load that in turn switches another SPST-NO load. One configuration for this is shown below.

Connecting Cables

Refer to XW2Z-R Cables for I/O Relay Terminals (Cat. No. G126) for details on the Connecting Cables.

Terms and Conditions Agreement

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

- (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.
- (b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE

PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See http://www.omron.com/global/ or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

<u>Errors and Omissions.</u> <u>Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is accurate.</u> assumed for clerical, typographical or proofreading errors or omissions.

2017.5

In the interest of product improvement, specifications are subject to change without notice.
